

Hello,

We are in favor of House Bill 5039. We have long been distressed about the emissions produced by medium and heavy duty trucks. We support legislation that would result in a decrease in the pollution caused by these vehicles.

We support SB 4. We are in favor of prioritizing low income residents and residents from "environmental justice communities" for the receipt of electric vehicle rebates.

We are very much in favor of strategies aimed at mitigating climate change and reducing pollution of all kinds.

We would like to see more electric vehicle charging stations in the state.

Thank you very much,
Thomas Ottman
